

Our fueling systems feature the latest controls technology for easier operation, monitoring and maintenance.

- Globally-supported Allen-Bradley controls platform with easy-to-source components
- Bright, color touch screens for all machine operations, self-diagnostics, alarms, faults and configurations
- CMD exclusive mobile app and webpage for remote, 24/7 monitoring of station performance
- Lockable disconnects to isolate each major piece of equipment, making it possible to conduct maintenance and still fuel vehicles
- Plug in phones, laptops and other devices with the courtesy outlet on the control panel, 120V 10A (control panel located away from compressor units.)

Our engineers and technicians support your equipment and optimize CNG station uptime with years of extensive equipment controls and programming experience, for wrap-around support, and zero fueling interruptions.

Call us at 1-800-626-0210 or email info@cmd-corp.com for more information

CNG systems designed, packaged and built by CMD comply with industry standards for safety and performance: NFPA 52, UL508A, AGA, ANSI, API, ASME, AWS, CSA, FEMA, IEC, ISO, NEC, OSHA, SAE. For details on specific industry standards, please contact info@cmd-corp.com
