

Fast Fill Dispensers

CMD partners with Kraus Global to provide industry leading dispensing technology. Like CMD equipment, [Kraus dispensers](#) are designed to withstand extreme weather and heavy use conditions with ease. Their dispensers come equipped with full flow safety relief valves as well as excess fill and flow safety shutdowns. This commitment to performance and safety has allowed them to receive the most approvals of any CNG dispenser on the market.

- Stand-alone design (fully self-contained electronics)
- Easy-to-read backlit displays
- In-line safety breakaways on both main and vent hose lines
- Ability to interface with most POS and card reader systems
- Flexible bus-based electronics allows for easy addition of peripherals

Time Fill Dispensers

For fleets and businesses that can utilize overnight or extended fueling times, the time-fill dispensing option allows for fuller tanks and more miles on the road between fuel-ups. CMD designs and manufactures Time Fill Dispenser Posts with rugged reliability in mind.

- Powder coated metal withstands harsh environments
- Flexible design allows 1 to 4 hoses on the same post
- 5000 psig pressure gauge on each post
- Manual stainless steel, lockable, shut off valve provided for each post
- Up to 20 GGE/min per hose (subject to compressor and storage configuration)
- Standard 15-foot hose, hoses up to 30 feet available

CNG systems designed, packaged and built by CMD comply with industry standards for safety and performance: NFPA 52, UL508A, AGA, ANSI, API, ASME, AWS, CSA, FEMA, IEC, ISO, NEC, OSHA, SAE. For details on specific industry standards, please contact info@cmd-corp.com
