# THE PEACE-OF-MIND DIFFERENCE IN CNG FUELING

## AES FUELING EQUIPMENT

**Reliable Solutions** for time-fill or fast-fill CNG fueling stations, electric charging stations and more.

### Portable, Scalable Solutions

Mighty Modular Fueling Systems are portable, affordable, expandable stations for small to medium fleets, and a simple entry method for those just starting to fuel with CNG. These are the only systems that can expand up to 4 compressors, to fuel up to 20 trucks in just a few hours. Fuel your fleet at night when rates are lower.

### Our Enclosures Make the Difference!

Ergonomic design for comfort and safety. Open access and elbow room for quicker repairs and maintenance.

## Quality Equipment for Fast, Reliable Fueling

### Best Uptime in the Industry

CMD systems consistently remain operational, even in harsh weather conditions - even when other brands fail.

High-performance, robust design, rigorous manufacturing and testing standards and wrap-around service support all contribute to our pledge of uninterrupted service for your customers.

## Continually Advancing Technology

### Innovation and Opportunity

CMD has developed unique innovation that delivers the safest, most reliable systems, with customized, remote access and management tools that ensure productivity and profit.

### Extensive Product Portfolio

CNG Compression Systems are configured for your fueling requirements. Compressors are available in a wide range of flow rates, and systems come complete with storage, inlet dryer, system controls and fueling dispenser. Walk-through, lighted enclosure design improves maintenance and operational efficiency.

### Markets

CMD is a trusted partner for key CNG and RNG markets. We will provide the best fueling experience for your customers, plus, we work with any fuel supplier.

### Application Solutions

We are the best partner for a variety of fueling situations, and our solutions include:

- Virtual Pipeline
- Pressure Boosters
- Mother-Daughter Stations
- Fast-Fill or Time-Fill Dispensers
- Pressure Reduction Systems
- Defueling Solutions

## Training and Parts

Friendly CMD parts experts provide customers with:

- Quick delivery of critical replacement parts
- Easy parts ordering and knowledgeable advice

CMD offers training programs for station operation and maintenance. Contact us at 1-800-438-7912 for more information.

## Station Monitoring

### 24/7/365

- Remote monitoring of CNG stations and equipment by friendly, trained CMD personnel
- Live camera feed provides real-time accuracy
- Diagnosing and correcting potential problems before they interrupt service
- Handling of all service calls and questions from drivers and operators
- Quick service dispatch when required
- Thorough follow-up to confirm customer satisfaction with service solutions
- Analytics and reporting of station performance
- Customers can access our convenient status board from their phone or other device

## CMD Insights

- Data management tool delivers real time, actionable data
- Free up man hours with maintenance alerts that prevent costly and time-consuming downtime repairs
- Customize your dashboard with your own key performance indicators

## Responsive Service and Lifelong Partnerships

CMD has a passionate commitment to customer service, with fast response and problem resolution and the integrity to stick with our customers through thick and thin.

Our customized service approach gives station managers flexibility.

- Customized service plans are tailored to your needs and are designed to prevent service interruption, ensure safety and prolong the life of your station and equipment
- Experienced technical service and quick response is available through our nationwide network of trained experts
- Our personal-touch service includes scheduling of regular, preventive maintenance to reduce the occurrence of field issues
